

The Wild Student

Melody: The Wild Rover

I've been a good student for many a week
I have studied the forces: the Strong and the Weak
And now I'm returning with knowledge in store
So I never will ask a dumb question no more

And it's no, nay never
No, nay never no more
Will I ask a dumb question
No, never no more

It was early in Kitzbüh'l my coffee was gone
And the lecturer just broke the gauge of $U(1)$
I posed him a question, he said to me straight
"It was right at the start but of course you were late"

And it's no, nay never
No, nay never no more
Will I be late for lectures
No, never no more

The Master of Penguins was hot at his game
There were loops and state mixings that all looked the same
He said *"Zat is easy, just look at zis side"*
Then he put up one more of his black-magic slides

And it's no, nay never
No, nay never no more
Will I understand theory
No, never no more

We came home from an ale-house, our money all gone
And we raised up our voices in "glorious" song
Old Egil he woke up, he stood there up high
He said *"say there young people, don't you know the time?"*

And it's no, nay never
No, nay never no more
Will I sing for Norwegians
No, never no more

I'll go home to my 'xperiment, confess what I've done
I have partied and studied with all of the young
When physicists gather, with knowledge in mind
The potential for party is one of a kind

And it's no, nay never
No, nay never no more
Will we get up that early
No, never no more

So it's no, nay never
No, nay never no more
Will we leave from this party
No, never no more
